

EXPERIENCE

Professional Internship

ORTOPEDIA TÉCNICA MATEO-SÍDRON - CÁDIZ, SPAIN

- Fabrication and customization of orthotic devices (Braces, KAFO, DAFO, AFO).
- Development of orthoses for children with cerebral palsy and neuromuscular disorders.
- Material selection and thermoforming of thermoplastics for custom orthotic solutions.
- Collaboration with clinicians to translate clinical assessments into functional device adjustments.
- Application of biomechanical principles to improve posture, stability, and mobility outcomes.
- Structural adaptation of orthotic components to enhance load distribution and functional efficiency.

SIORTO - LISBON, PORTUGAL

- Utilization of 3D scanning systems for accurate residual limb modeling.
- Understanding of prosthetic alignment, suspension systems, and pressure management.
- Integration of clinical data into device development processes.
- Manufactured prosthetic sockets using additive manufacturing (3D printing) technologies.
- Provided support during post-fitting adaptation and functional training.

APDP DIABETES - LISBON, PORTUGAL

- Performed foot assessments focusing on pressure distribution, ulcer prevention, and biomechanical risk factors.
- Assisted in preventive care strategies to reduce the risk of diabetic foot complications.
- Designed and manufactured custom insoles using CAD/CAM technology.

EDUCATION

Bachelor in Prosthetics and Orthotics

Escola Superior de Saúde de Lisboa • Lisbon, Portugal • 2022

VOLUNTEERING

Project IN

- Supported learning development through individualized guidance and mentoring.
-
